

# SNOWSCHOOL

With winter swiftly approaching, Montana Discovery Foundation is excited to prepare for the SnowSchool season! This year, we aim to transform SnowSchool into an experience that goes beyond a simple snowshoeing trip. Check out what we are doing this season and how these lessons can complement your curriculum.

## SNOWPACK PREDICTION CHALLENGE

Join other SnowSchool sites in the Snowpack Prediction Challenge! Geared towards 4th-8th grades, this is a fun activity to do with your classes and compete with other schools. If you have younger grades, you can still participate. The winners of the Snowpack Challenge will receive an ice cream party! Check out the Snowpack Prediction Challenge here:

## PRESEASON CLASSROOM VISITS

These activities will give your classroom or group a head start on what we will cover while we are outside on your SnowSchool field day. Topics will include local watersheds, the water cycle, intro to snow science and/or the Snowpack Prediction Challenge. We are happy to curate the program to your classroom or group's needs (i.e. duration of lesson, dates, times, etc.), but we request a minimum of 45 minutes per lesson.

## SNOWSCHOOL REGISTRATION AND INFORMATION

SnowSchool days will take place from January-March. (You do not need to have a pre season classroom visit to register for SnowSchool.)
